Profile Summary

I am a recent graduate from Moringa school with a background in software development. I majored in full-stack development and have long been fascinated by developing designs and builds that are dynamic and data-driven. I am looking for a position that will allow me to use my top-notch skills in python and javascript. In addition, I am well versed in solving technical problems, handling workplace dynamic conditions and managing time. I have excellent interpersonal skills and high-level organizational skills. I am trained to amalgamate these technologies to form the technical ecosystem and backbone needed to build and operate in any company. So far I have worked on many projects which I believe have given me enough experience to work in any work environment. However, I am looking to start working as an intern and then work up towards moving up as I gain more experience. I am looking forward to making my career journey an exciting one in any company.

Professional Experience

Software Developer- Moringa School

- Designing the structure of websites and applications, and creating features that promote user navigation through the use of javascript, HTML, CSS and bootstrap
- Creating logic that instructs the application on how to interpret user input and what feedback to give the user after executing the submitted request. I achieved this by creating an algorithm that fetches data from the database using REST API.
- Created an application that can manipulate data stored in the database system using python, SQL Django, and flask.
- Developed integration with REST API for movie APIs, and Weather API for accessing weather forecasts for different cities.
- Developed proficiency in Git and Git -hub working on GitHub collaborations with team members efficiently
- Planning, writing and debugging web applications and software with complete accuracy.

Education

Moringa School

Software Development Course

Feb 14, 2022 - Jul 15, 2022

University of Kabianga

Degree in Biochemistry

August 2016 - April 2021
